REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art fails to teach a saw blade for power tools, wherein the blade possess parallel recesses spaced apart from one another and extending as far as an upper edge of the blade back remote from the tothing in combination with additional limitations of claim 12. U.S. Patent Yoshida et al. (4,958,546) disclose a saw blade for power tools comprising a blade and tothing, including many saw teeth lined up in succession, where the saw teeth have the same tooth thickness of the saw blade, wherein said same tooth width is different from the saw teeth in the preceding and succeeding portion of the tothing (see Figure 12). In a different embodiment, Yoshida et al. also disclose parallel recesses (11; see Figure 6(a-c)) spaced apart from one another and disposed offset from one another longitudinally of the saw blade. However, the recesses do not extend as far as an upper edge of the blade back remote from the tothing. Although it would have been obvious to modify Figures 6(a-c) to have the particular blade configuration as shown in Figure 12, there is no motivation to extend the recesses to an upper edge of the blade back remote from the tothing.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
